Understanding OF Data

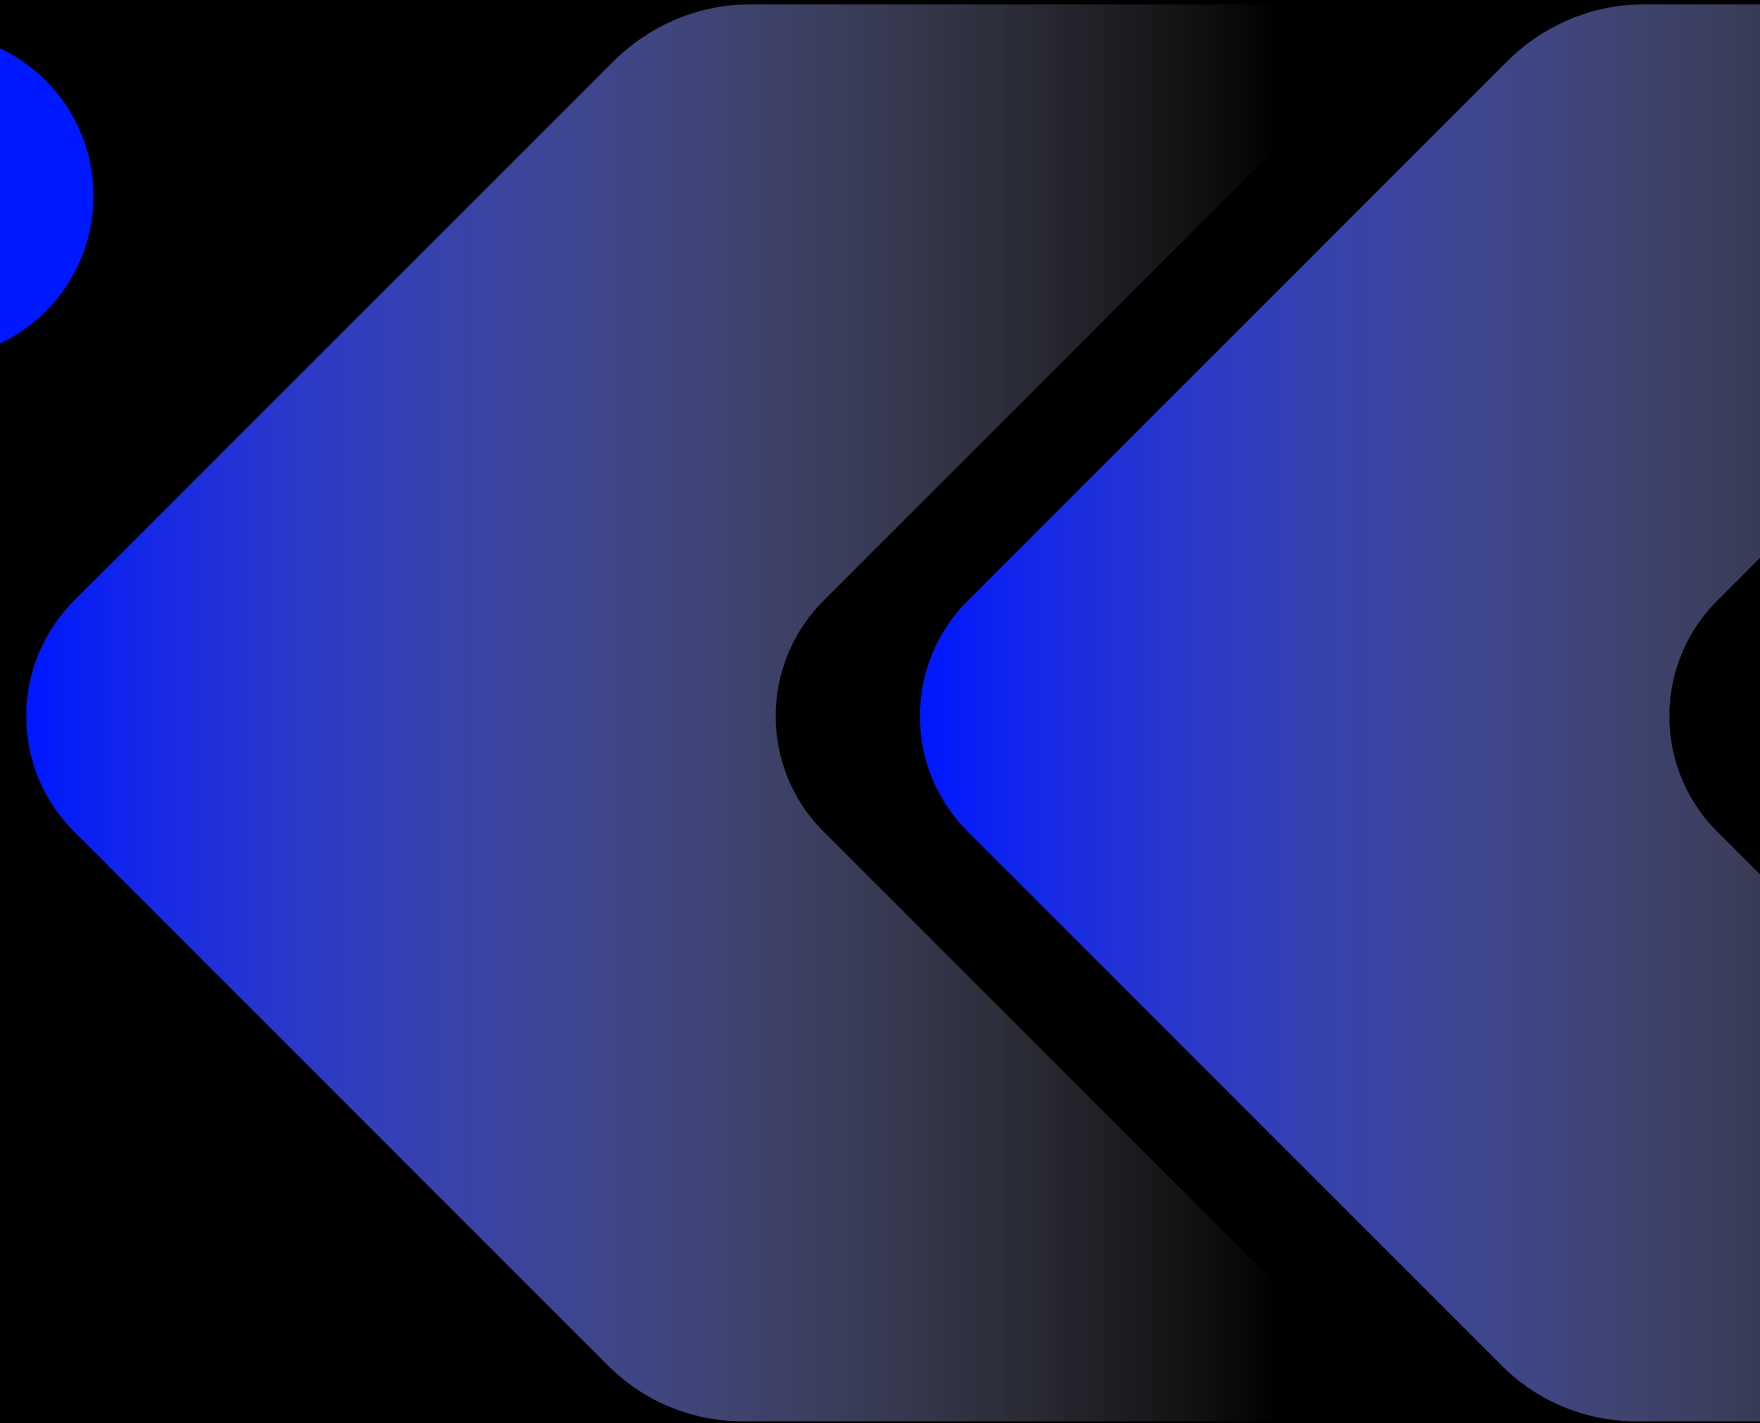

The dataset used in this assignment represents an Employee Management System of a company. It contains information about employees, their departments, and the projects they are working on.

Data set **Overviews**

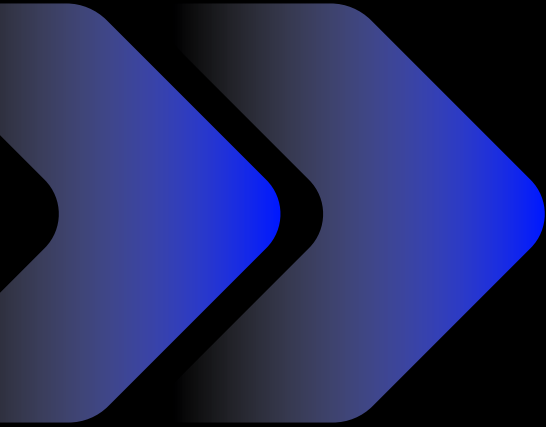

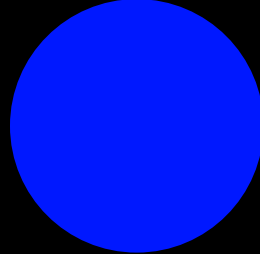

- **Employee Table**
- **Department Table**
- **Projects Table**
- **Employee_Projects Table**

Know More

- *Retrieve all records from the Employees table.*
- *Retrieve employees with a salary greater than 50,000.*
- *Retrieve employees who belong to the HR department.*
- *Retrieve unique department IDs and name from the Department table.*
- *Find the total number of employees.*
- *Find the maximum salary of employees.*
- *Find the minimum salary of employees.*
- *Find the average salary of employees.*
- *Find the total salary of all employees.*

- 
- *Display employees sorted by salary in descending order.*
 - *Retrieve employees whose names start with the letter 'A'.*
 - *Retrieve employees who do not have a manager (NULL values).*
 - *Retrieve employees who joined after 1st January 2022.*
 - *Retrieve employees whose salary is between 30,000 and 60,000.*
 - *Retrieve employees who belong to department 1 or 2.*
- 

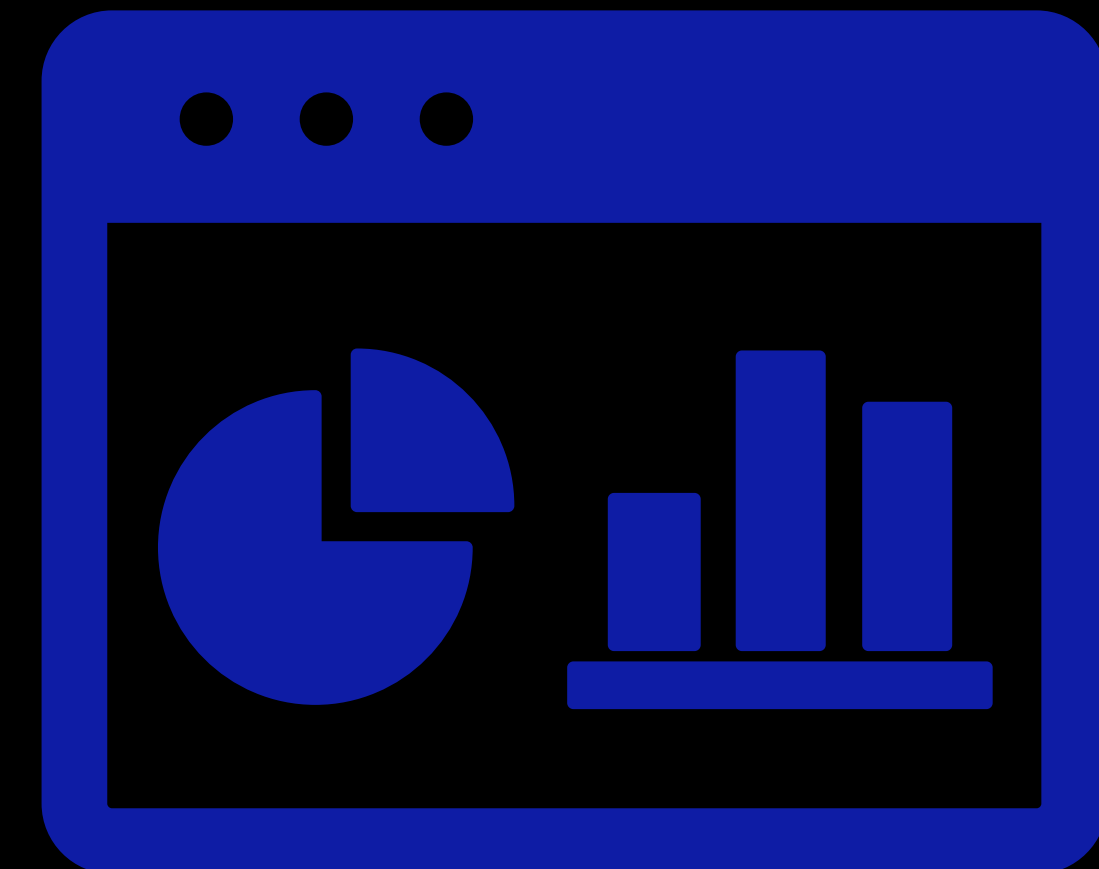

[Know More](#)

Q1.Retrieve all records from the Employees table.

Ans **Select * From Employees**

Results		Messages				
	emp_id	emp_name	manager_id	dept_id	salary	join_date
1	1	Amit	NULL	1	60000	2020-01-01
2	2	Ravi	1	1	40000	2021-02-10
3	3	Neha	1	1	50000	2022-03-15
4	4	Priya	NULL	2	45000	2020-05-20
5	5	Rahul	4	2	30000	2021-06-25
6	6	Sneha	NULL	3	70000	2019-07-10
7	7	Karan	6	3	50000	2022-08-05
8	8	Pooja	NULL	4	65000	2021-09-12
9	9	Ankit	8	4	35000	2022-10-18

Q2.Retrieve employees with a salary greater than 50,000.

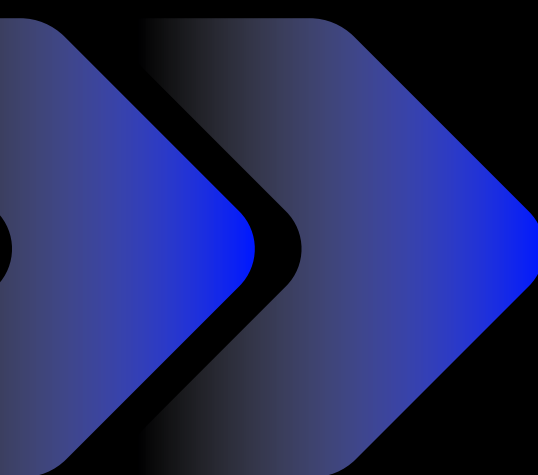

Ans **Select * From Employees**
 Where salary > 50000

Results Messages						
	emp_id	emp_name	manager_id	dept_id	salary	join_date
1	1	Amit	NULL	1	60000	2020-01-01
2	6	Sneha	NULL	3	70000	2019-07-10
3	8	Pooja	NULL	4	65000	2021-09-12

Q3.Retrieve employees who belong to the HR department.

Ans `select e.emp_name , d.dept_name from
Employees e inner join Departments d
on e.dept_id = d.dept_id
where dept_name = 'Hr'`

	emp_name	dept_name
1	Priya	HR
2	Rahul	HR

Q4.Retrieve unique department IDs and name from the Department table.

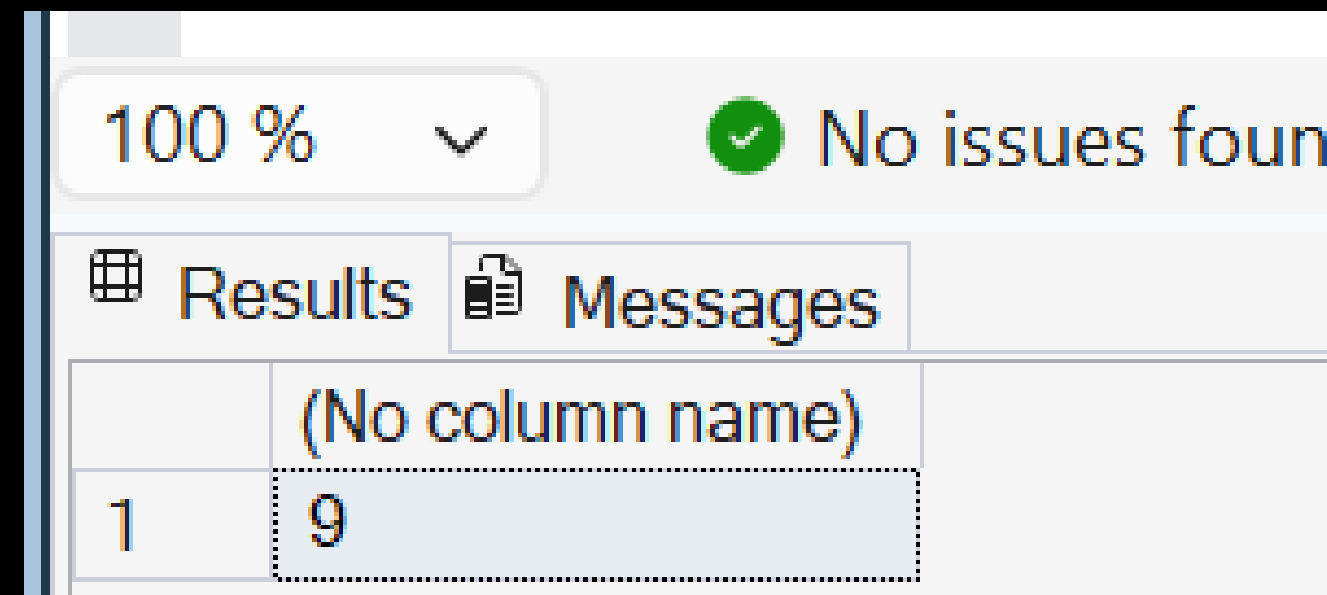

Ans `select distinct dept_id , dept_name
from Departments`

Results		Messages
	dept_id	dept_name
1	1	IT
2	2	HR
3	3	Finance
4	4	Sales

Q5.Find the total number of employees.

Ans `select count(*) from Employees`

The screenshot shows a database query result window. At the top, there is a dropdown menu set to "100 %" and a green checkmark icon followed by the text "No issues found". Below this, there are two tabs: "Results" (selected) and "Messages". The "Results" tab displays a table with one column labeled "(No column name)" and one row with the value "9". The row number "1" is visible in the first column of the table.

	(No column name)
1	9
